

## LARGE POWER

Large Power members would see a \$7.00 increase to their availability charge and a \$0.001 increase to the distribution variable energy charge. There would be no change to power supply energy, distribution demand, or power supply demand charges. The Power Supply Cost Recovery (PSCR) charge will be adjusted as necessary. It is important to note that the PSCR billing mechanism is designed to fluctuate as needed to respond to small changes in power supply costs.

Element	Present	Proposed 2024
Availability Charge	\$75.00	\$82.00
Distribution Variable Energy	\$0.004	\$0.005
Power Supply Energy	\$0.07000	\$0.07000
Distribution Demand	\$3.50	\$3.50
Power Supply Demand	\$6.50	\$6.50
PSCR	\$0.0020	\$0.0040
