

Large Power

Under **Phase 1** of the rate changes (April 2025), Large Power members would see:

\$7.00 increase to their availability charge

\$0.001 increase to the distribution variable energy charge.

There would be no changes to power supply energy, distribution demand, or power supply demand charges. The Power Supply Cost Recovery (PSCR) charge will be adjusted as necessary. It is important to note that the PSCR billing mechanism is designed to fluctuate as needed to respond to small changes in power supply costs

Element	Present	Proposed Phase 1 2025
Availability Charge	\$82.00	\$89.00
Distribution Variable Energy	\$0.005	\$0.009
Power Supply Energy	\$0.070	\$0.070
Distribution Demand	\$3.60	\$3.60
Power Supply Demand	\$6.50	\$6.50
